

# MOHAMED AYMAN MOHAMED AHMED

System Administrator | Cloud Engineer

Cairo, Egypt +201000281389 mu.ayman17@gmail.com linkedin.com/in/mohamed-ayman-alkilany

## PROFESSIONAL SUMMARY

---

System Administrator and Cloud Engineer experienced in building and securing enterprise infrastructure across on-premises and AWS environments, with a strong focus on reliability, access control, and operational efficiency. Skilled in designing and managing infrastructure with a strong emphasis on stability, performance, and security best practices. Experienced in designing and managing infrastructure with a strong emphasis on stability, performance, and security best practices. Skilled at integrating identity, network, and storage systems into cohesive architectures that simplify management and strengthen access control. Continuously developing toward a Cloud and DevOps-oriented approach, with a focus on automation, scalability, and operational excellence.

## PROFESSIONAL EXPERIENCE

---

**System Administrator – EEC Group (Engineering Enterprises for Civil & Steel Constructions S.A.E.)** Apr 2026 – Present

- Built and delivered a production-ready Active Directory infrastructure from scratch serving approximately 300 users within 3 days, including OU design, Group Policy, and RBAC using security groups.
- Executed controlled migration of users and groups between domains, preserving access structures and eliminating legacy misconfigurations.
- Integrated identity with network and storage systems (FortiGate firewalls and Synology NAS) to enforce centralized, secure access control.
- Managed Dell and HP physical servers and designed virtualized infrastructure on VMware vSphere, ensuring high availability and optimized resource utilization.
- Implemented a resilient backup and disaster recovery strategy using Veeam with offsite backups, improving data protection and business continuity.

**Cloud Solutions Architect – National Telecommunication Institute (NTI)** Jan 2026 – Apr 2026

- Administered Red Hat Enterprise Linux systems including user/group management, LVM storage, systemd services, networking, SELinux policies, firewall configuration, and package management using DNF/YUM.
- Managed VMware vSphere environments including ESXi hosts, vCenter, HA/DRS clusters, vMotion, Storage vMotion, distributed switches, and datastore management.
- Retained Red Hat OpenShift clusters managing projects, deployments, pods, services, routes, persistent storage, ConfigMaps, and Secrets using oc CLI and web console.
- Designed secure AWS architectures including VPC networking, EC2, S3, RDS, Elastic Load Balancing, Auto Scaling, IAM policies, KMS encryption, CloudWatch monitoring, and CloudTrail logging.
- Applied Huawei HCCDA Tech Essentials concepts across data center infrastructure, enterprise networking, cloud computing models, storage technologies, and virtualization.

**System Administrator – Mercury Visual Solutions**

Aug 2024 – Apr 2026

- Administered Windows Server infrastructure including Active Directory and Microsoft Exchange; supported 200+ users, enforced Group Policy security policies, performed patch management and monitoring, achieving 99.9% service availability.

- Oversaw server hardware operations using iLO and iDRAC interfaces, performing health checks, system diagnostics, firmware updates, and BIOS/boot configuration adjustments.
- Designed and engineered VMware vSphere environments, including ESXi, vCenter, virtual machine provisioning, snapshots, migrations, and performance optimization.
- Implemented Veeam Backup & Replication solutions, including backup job configuration, retention policies, recovery testing, and restore validation.
- Configured and secured Sophos XG Firewall features including NAT, VPN, SD-WAN, Intrusion Prevention System (IPS), and web/application filtering.
- Operated TrueNAS storage solutions, including SMB share configuration, access permissions, quota management, and capacity monitoring.
- Deployed and upheld Ubuntu Server platforms, including Kitsu (CGWire), Snipe-IT, and OnlyOffice.
- Built and operated containerized services using Docker and Docker Compose, implementing persistent storage and custom networking configurations.
- Assisted with network switch configuration and monitoring, including VLAN configuration, trunking, and baseline network security controls.

## EDUCATION

---

### Bachelor of Engineering

Higher Technological Institute - 10th of Ramadan City

2019 - 2024

GPA: 3.23 / 4.0 (Very Good)

Graduation Project: Secure enterprise network design using DMVPN, IPsec, Windows Server, Active Directory, DNS, DHCP and GPO (Grade: Excellent, A+).

## CERTIFICATIONS AND TRAINING

---

AWS Academy Training {Cloud Practitioner - Cloud Solutions Architect (Associate)}

Red Hat System Administration I and II (RH124, RH134) - Attendance Certified

Docker Containerization

VMware Certified Professional – Data Center Virtualization (VCP-DCV)

Sophos XG Firewall Administration

Veeam Backup and Replication

Microsoft Certified Solutions Associate (MCSA)

Cisco CCNA 200-301

## CORE SKILLS

---

**Cloud & Platforms:** AWS (EC2, VPC, S3, IAM, RDS, Auto Scaling, ELB, CloudWatch)

**Systems:** Windows Server, Red Hat Enterprise Linux (RHEL), Active Directory, Group Policy

**Virtualization:** VMware vSphere (ESXi, vCenter, HA, DRS, vMotion, Storage vMotion)

**Containers:** Docker, Kubernetes, OpenShift

**Networking & Security:** TCP/IP, DNS, DHCP, VPN, VLANs, Load Balancing, FortiGate & Sophos Firewalls, Network Segmentation

**Backup & Storage:** Veeam Backup & Replication, TrueNAS, Synology

**Infrastructure:** High Availability, Disaster Recovery, Hybrid Environments

**Operations:** Monitoring, Performance Tuning, Troubleshooting, Documentation
